CAREER SUMMARY

Final-year Computer Science Engineering student at Kumaraguru College of Technology with strong expertise in full-stack development (React, Node.js, Django) and AI/ML applications, including object detection model training. Experienced in UI/UX design and Power BI dashboard development. Currently enhancing skills in the MERN stack and Data Analytics to build scalable, data-driven, and intelligent software solutions.

SKILLS AND STRENGTHS

- **Programming** - Python, JavaScript
 - **Web Development** - React.js, Node.js, Django, HTML, CSS, Bootstrap
 - **Databases** - MySQL, MongoDB, NoSQL
 - **Data & Analytics** - Power BI, SQL
 - **AI/ML** - Object Detection Model Training, Computer Vision
 - **Design** - UI/UX, Figma, Adobe Tools
-

PROJECTS

- **Job Portal – Full-Stack Web Application** Developed a full-stack job portal using React, Django, and Django REST Framework with PostgreSQL, featuring user registration and authentication, job listing and application APIs, multi-application prevention, dynamic routing, and a responsive Tailwind CSS UI.
- **Gemini Clone – AI Chat Application:** Built using React and Google Gemini API to deliver real-time AI-powered conversational responses.
- **YouTube Clone – Video Streaming Platform:** Developed with React focusing on video listing, playback UI, and responsive design.
- **Golf Charity Platform – Subscription-Based Web Application** Built a full-stack golf charity platform using Next.js 15, Supabase, and Stripe, featuring user authentication, subscription plans (monthly/yearly), a Stableford score tracker with PostgreSQL triggers, a charity contribution engine, and an admin panel with draw management and winner verification.
- **Explainable Multi-Level Diabetes Prediction System – AI/ML Web Application** Developed a full-stack healthcare AI application using React, Django, XGBoost, and SHAP, featuring multimodal data input (manual, voice, OCR via Google Gemini Vision), four-level risk stratification with explainability visualizations, future risk simulation sliders, and a conversational Gemini AI health assistant.

- **E-Commerce Sales Dashboard – Data Visualization (Tableau)** Built an interactive YTD sales analysis dashboard using Tableau, visualizing key business metrics including Sales, Profit, Order Quantity, Market Share, and Customer Acquisition trends with category-wise YTD vs PYTD comparisons and market-wise insights, published on Tableau Public.
 - **LearnHub – Mobile App UI/UX Design (Figma)** Designed a complete mobile learning app prototype in Figma covering the full user journey including onboarding, featured course browsing, search experience, course details, saved courses, and user profile, with a focus on clean UI, intuitive navigation, and seamless UX flow.
 - **AI-Powered Intelligent Traffic Monitoring Dashboard:** Built using Python, OpenCV, YOLO, Deep Learning, and Tkinter, integrating crash detection, ambulance detection, siren detection, and multi-lane vehicle counting into a unified dashboard.
 - **Movie Database App – Full-Stack MERN Application:** Developed using MongoDB, Express.js, React, and Node.js with TMDB API for dynamic movie exploration and search.
 - **E-commerce Website – Online Shopping Platform:** Built using Django and MySQL, featuring user authentication, cart management, and favorites functionality.
-

EDUCATION

- Kumaraguru College of Technology B.E in Computer Science and Engineering May 2026 | Saravanampatti, Coimbatore
 - Y.R.T.V Higher Secondary School HSC May 2021 | Sivakasi, Virudhunagar
 - Y.R.T.V Higher Secondary School SSLC May 2019 | Sivakasi, Virudhunagar
-

Experience

- Attended a Power BI Masterclass focusing on dashboard creation and data visualization.
 - Completed an Internship in UI/UX Design, working on web and app design concepts.
 - Completed an Internship in Full Stack Development covering frontend and backend technologies
 - Completed an Internship in Data Analytics, working on data cleaning, analysis, and visualization using real-world datasets.
 - Participated in a Generative AI Mastermind Workshop exploring modern GenAI tools and applications
-

Certifications

- Python Programming – Guvi
 - Database Management Systems (DBMS) – Infosys
 - AWS Academy Cloud Foundations – AWS
 - Getting Started with Artificial Intelligence – IBM SkillsBuild
 - Generative AI in Action – IBM SkillsBuild
 - Cybersecurity Fundamentals – Tech Mahindra Foundation
-

Interests

- Full Stack Web Development
 - UI/UX Design & Prototyping (Figma, Adobe)
 - Power BI Dashboard Development & Data Visualization
 - Computer Vision & Object Detection Model Training
-
